Dear Sir:

In response to the Office Action dated December 4, 2002 (Paper No. 2600), please  
amend the above-identified U.S. patent application as follows:

In the Specification

Please rewrite paragraph 18 of the specification as follows:

A1 [0018] Figure 3 shows an alternative frame package which includes an additional threaded area 300 above the die 100 and glass lid 230. The additional area 300 has inner threads, which are threaded to accept a lens 340. In this way, a lens may be mounted within the package, associated with the die. For example, this may enable focusing of certain incoming rays to the die. While this embodiment shows the inner surfaces as being threaded, it should be understood that other surface features could be used alternatively to hold the lens 340 in place.
